

Module 9: Course Wrap-Up → Instructors Guide

M9A.1: Cover Slide

Module 9 **Course Wrap-Up**

Module Objectives

- ◆ Describe how the course learning objectives were achieved
- ◆ Identify success stories and list ways to build on what was learned

Module 9 Deploying Integrated Intelligent Transportation Systems 2

Delivery:

- Review the module objectives

Output:

- N/A

Notes:

-

Learning Objectives

- ◆ Identify at least five benefits provided by integrated, intermodal intelligent transportation systems (ITS)
- ◆ Identify the agencies with whom information should be shared in integrating ITS

Module 9

Deploying Integrated Intelligent Transportation Systems

3

Delivery:

- Review the first objective
- ASK:
 - “Was this objective achieved ? How?”
- Summarize
- Review objective 2
- ASK:
 - “Was this objective achieved ? How?”
- Summarize

Output:

- N/A

Notes:

- You may want to ask participants to “rate” how well each objective is achieved
 - Use a simplified scale such as:
 - + = fully satisfied
 - 0 = moderately satisfied
 - = not adequately satisfied
- This can be done by asking participants to raise their hands and doing a rough count → if a consensus is obvious at one level or another, stop and note it
- This can be repeated for the goals developed by the participants in Module 0

Learning Objectives (cont.)

- ◆ Identify the information flows that should be established by your agency and each “partner” agency to operate an integrated ITS
- ◆ Describe the various “types” of information sharing that exist in today’s transportation environment

Module 9

Deploying Integrated Intelligent Transportation Systems

4

Delivery:

- Review objective 3
- ASK:
 - “Was this objective achieved ? How?”
- Summarize
- Review objective 4
- ASK:
 - “Was this objective achieved ? How?”
- Summarize

Output:

- N/A

Notes:

-

Learning Objectives (cont.)

- ◆ Describe the National ITS Architecture and how it can be used as a time saving tool to implement integrated ITS
- ◆ Explain the institutional challenges that must be addressed to integrate ITS successfully

Module 9

Deploying Integrated Intelligent Transportation Systems

5

Delivery:

- Review objective 5
- ASK:
 - “Was this objective achieved ? How?”
- Summarize
- Review objective 6
- ASK:
 - “Was this objective achieved ? How?”
- Summarize

Output:

- N/A

Notes:

-

Learning Objectives (cont.)

- ◆ Explain the technical challenges that must be addressed to successfully deploy an integrated ITS
- ◆ Explain the importance of local issues and challenges within a regional context
- ◆ Understand procurement alternatives

Module 9

Deploying Integrated Intelligent Transportation Systems

6

Delivery:

- Review objective 7
- **ASK:**
 - “Was this objective achieved ? How?”
- Summarize
- Review objective 8
- **ASK:**
 - “Was this objective achieved? How?”
- Review objective 9
- **ASK:**
 - “Was this objective achieved? How?”
- Review “expectations” flip-chart developed in Module 0 in order to discuss if they were met
- Summarize

Output:

- N/A

Notes:

-

ITS Deployment

- ◆ Think nationally
- ◆ Plan regionally
- ◆ Build locally

Module 9

Deploying Integrated Intelligent Transportation Systems

7

Delivery:

- Need to consider the larger picture (Regional Context)
- A regional perspective is important in planning, developing, and operating (3 major steps) **integrated** ITS projects and operating them in a coordinated manner
- May not be obvious that a local project decision may have regional implications
- Consider ITS deployment and integration as regional program, NOT a local project
- A national perspective is necessary for some transportation services (e.g., in-vehicle traveler information systems)
- Use results from the Course and Case Study exercises

Output:

- N/A

Notes:

-

Individuals Do Make a Difference

- ◆ Technology is important
- ◆ Institutions are more important
- ◆ People are the most important
- ◆ Examples of people who made a difference in solving problems

Module 9

Deploying Integrated Intelligent Transportation Systems

8

Delivery:

- Institutional issues are usually more challenging than technical issues
- Cite examples from the course, Course Exercise, and participant comments

Output:

- N/A

Notes:

-

M9A.9: Example (Don Dey)

(1 min)

Congestion significantly impacts the expansion of our critical convention and recreation venues.

◆ Guided Anaheim ITS

- ✦ Ties to Caltrans Districts 7 & 12
- ✦ Provided ATIS interface for Caltrans
- ✦ Many funding sources

◆ “Partner” Orange County agencies

- ✦ Super streets coordination
- ✦ Signal roundtable

Don Dey

Module 9

Deploying Integrated Intelligent Transportation Systems

9

Delivery:

- Review key points
- Jon Ringler and Jim Paral assisted
- Currently is Transportation Manager for City of Menlo Park

Output:

- N/A

Notes:

-

M9A.10: Example (Bob MacLennan)

(1 min)

NEED: Improve operations management in a highly congested urban area

- ◆ **Houston Metro**
- ◆ **Transit agency, but**
 - ✦ Leads ITS HOV efforts
 - ✦ Coordinates regional freeway management
 - ✦ Leads citywide signal computerization
- ◆ **Innovative financing**

Bob MacLennan

Module 9

Deploying Integrated Intelligent Transportation Systems

10

Delivery

- Review key points
- Make sure to note “a transit manager becomes the lead champion for a regional ITS program”

Output:

- N/A

Notes:

-

NEED: Get involved agencies together to reduce congestion in high volume corridor

- ◆ **Forged alliance of**
 - ◆ LA County Commission, Caltrans
 - ◆ City of Los Angeles
 - ◆ California Highway Patrol
- ◆ **For LA Smart Corridor project**
 - ◆ “Found” \$50 M (many sources)
 - ◆ Established technical and steering committees

Ginger Gheradi

Module 9

Deploying Integrated Intelligent Transportation Systems

11

Delivery

- Review key points
- Shahrzad Amiri, Verej Janoyan, Lynn Diebold, Hector Obeso assisted
- Currently at Ventura County Commission
- Note that a staff member of a commission becomes the champion and that her ability to raise funding was critical

Output:

- N/A

Notes:

-

M9A.12: Example (Lt. C. D. Tyler)

(1 min)

Question: How do you foster strong ties between the enforcement community and a highway agency?

- ◆ Liaison CHART to Maryland State Police
- ◆ Trains State Police on ITS
- ◆ State Police “shared space”
- ◆ Now, excellent joint support and cooperation

Lt. C.D. Tyler

Module 9

Deploying Integrated Intelligent Transportation Systems

12

Delivery

- Review key points
- Lt. Tyler is a speaker/advocate and an “ombudsman”

Output:

- N/A

Notes:

-

M9A.13: Example (Tom Farrington)

(1 min)

Question: How can we assist the minority community in participating in ITS?

- ◆ Brought HBCUs and minority businesses to ITS
- ◆ Strengthened HBCU ITS education program
- ◆ Formed HBCU/ sponsor relationships

Tom Farrington

Module 9

Deploying Integrated Intelligent Transportation Systems

13

Delivery

- Review key points
- Victoria Fore assisted

Output:

- N/A

Notes:

-

What Can You Do and How Can You Do It?

- ◆ **Facilitate the information sharing between ITS components**
- ◆ **Develop/enhance regional cooperation between stakeholders**
- ◆ **Facilitate the decision-making process at both regional and local levels**
- ◆ **Inform/educate others**

Delivery:

- Review the 4 points
- This is an outline slide for subsequent slides so do not dwell on the points

Output:

- N/A

Notes:

- Each point is discussed in the subsequent slides

Facilitate Regional Integration of ITS: How?

- ◆ **Participate on committees and task forces**
- ◆ **Introduce the opportunities of operations and management in terms of alternatives/options**
- ◆ **Provide sample language for mission/vision statements**
- ◆ **Introduce information sharing operations and management concepts to wide range of stakeholders**

Module 9

Deploying Integrated Intelligent Transportation Systems

15

Delivery:

- Ask for ideas from the participants first.
- Most agencies welcome interested and informed participants
- Look for opportunities to volunteer and get involved
- Your agency may provide a staff person for committees/task forces
- Carry message that ITS can be combined/integrated into traditional capital and operations projects to provide additional benefits

Output:

- N/A

Notes:

-

**M9A.16: Develop/Enhance Regional Cooperation Between Stakeholders.
How? (4 min)**

Develop/Enhance Regional Cooperation Between Stakeholders: How?

- ◆ Identify leaders and assist them
- ◆ Identify and expand existing coordination points
- ◆ Include operations and management in planning process
- ◆ Become a team member

Module 9

Deploying Integrated Intelligent Transportation Systems

16

Delivery:

- Ask for ideas from the participants first.
- Broaden involved stakeholders (Transit, CVO, EMS, private sectors)
- Identify new/additional stakeholders
- Showcase benefits of ITS infrastructure
- Articulate need for regional framework based on National ITS Architecture
- Promote regional/intermodal thinking
- Link requirements with operations

Output:

- N/A

Notes:

-

Facilitate the Decision-Making Process: How?

- ◆ **Get involved early**
- ◆ **Bring agencies/stakeholders together**
- ◆ **Get involved in pre-program planning**
- ◆ **Participate on planning committees**
- ◆ **Encourage operations and management infrastructure policies**
- ◆ **Consider operations and management as an integral part of all projects**

Module 9

Deploying Integrated Intelligent Transportation Systems

17

Delivery:

- Ask for ideas from the participants first
- Use the results of the Course Exercise as much as possible
- Be an individual who assumes a leadership or partnership role (If not you, who?)
- Address difficult issues and problems that cross functional lines
- Provide information and materials

Output:

- N/A

Notes:

-

Inform/Educate Others: How?

- ◆ **Look for opportunities to provide information/materials**
 - ◆ Professional conferences/meetings
 - ◆ Major program/project reviews
 - ◆ Municipal/community meetings
 - ◆ Individuals
- ◆ **Identify new stakeholders**
- ◆ **Develop materials**

Module 9

Deploying Integrated Intelligent Transportation Systems

18

Delivery:

- Ask for ideas from the participants first
- Foster local and regional ITS champions
- Take initiative
- Develop expertise in some area of ITS integration

Output:

- N/A

Notes:

-

ITS Information Sources

- ◆ **Internet**
- ◆ **U.S. DOT (ITS Joint Programs Office)**
 - ◆ <http://www.its.dot.gov>
- ◆ **ITS America**
 - ◆ <http://www.itsa.org>
- ◆ **ITE**
 - ◆ <http://www.ite.org>

Module 9

Deploying Integrated Intelligent Transportation Systems

19

Delivery:

- Ask participants if they have any experience/feedback on these sites

Output:

- N/A

Notes:

-

Other ITS Information Sources

- ◆ **Draft ITS standards**
- ◆ **Communications trade-off studies**
- ◆ **Joint use studies**
- ◆ **Trade journals**
- ◆ **Commercial Vehicle Operations industry**
- ◆ **Computer journals**

Module 9

Deploying Integrated Intelligent Transportation Systems

20

Delivery:

- Review and ask participants to add any others to the list

Output:

- N/A

Notes:

-

Course Wrap-Up

- ◆ **What actions could you take in the next few months to:**
 - ◆ Enhance your agency's/region's awareness of ITS?
 - ◆ Encourage the integration of ITS infrastructure in specific programs or projects at your agency/organization and in your region?

Module 9

Deploying Integrated Intelligent Transportation Systems

21

Delivery:

- Ask the questions
- Ask the participants to write down four or five specific actions they can personally take → give them a few minutes to write the information
- Solicit examples from participants and discuss where they can be generalized to others in the group
- Provide positive feedback – “Good”
- Thank the participants for playing their part --> it certainly helped

Output:

- N/A

Notes:

- Do not use a flip-chart but instead keep interest and attention focused on participants
